Gibson Transportation Consulting, Inc. was formed in 2009 to provide the highest quality traffic engineering, transportation planning, and parking consulting services to both public and private sector clients. We offer over 200 years of collective transportation analysis experience, most of which has been gained on projects located in Southern California and across the western United States. We specialize in the preparation of the transportation and parking sections of environmental documents for large and small development projects, general and specific plans, and regional and local transportation projects. We work collaboratively with multi-disciplinary teams to produce clear, logical, and readable technical reports, and we excel in interaction with the public and with decision-makers to explain the analyses and the mitigation programs contained in those reports. We work on a wide variety of projects that vary in both size and scope, and our primary goal is to effectively serve all of our clients. Gibson Transportation Consulting is a certified Small (Micro) Business Enterprise with the State of California, a Local Small Business Enterprise with the County of Los Angeles, and a certified Small Local Business with the City of Los Angeles.
